

ROBOTIC SINGLE SITE HYSTERECTOMY

Dr Jason Tan

Gynaecological Oncologist

Minimally Invasive Surgeon: Laparoscopic and Robotic

Profile

Dr Jason Tan is a certified gynaecologic oncologist specialising in minimally invasive surgery including robotics. He pioneered the robotic surgery for gynaecology and gynaecological oncology in Western Australia with the da Vinci System and performed the first single site robotic hysterectomy in Western Australia.

Dr Tan founded the WOMEN Centre, a leading multidisciplinary private centre for women's health in Western Australia, in 2014. The specialists at WOMEN Centre provide a truly collaborative approach to patient care in order to ensure the best outcome possible and patients regaining their quality of life after treatment.

Besides his practice at WOMEN Centre, Dr Tan devotes his time to the public health service as a consultant gynaecological oncologist at King Edward Memorial Hospital, which includes the teaching and training of medical trainees and junior doctors. He is also the current lead clinician for gynaecology and gynaecological oncology for the Western Australia Cancer and Palliative Care Network and a clinical senior lecturer at University of Notre Dame and University of Western Australia as well as preceptor at various surgical skills development workshops.

da Vinci® Hysterectomy

The da Vinci® Surgical System is powered by state-of-the-art robotic technology. The System allows the surgeon's hand movements to be scaled, filtered and translated into precise movements of micro-instruments within the operative site. The da Vinci System enhances surgical capabilities by enabling the performance of complex operations through tiny surgical openings.

Benefits of Robotic Hysterectomy

- ✓ Minimally invasive
- ✓ Shorter hospital stay
- ✓ Less blood loss = less blood transfusions
- ✓ Significantly less pain
- ✓ Faster recovery
- ✓ Less scarring
